Hi Susan, attached is a draft of our proposal, everything is separated out by task, including the budget. The timeline for the project is 3 1/2 years, though our plan is to provide you information when needed. I've copied Roel Lopez and Debbie Danford on this email. As mentioned this morning, we have an existing cooperative agreement with FWS for Region 4 and the language is pretty loose and so I think we can park the funds here. I've copied Roel Lopez and Debbie Danford on this email and they can help with this. Given the political landscape, I would move the entire amount and then we can draw against those funds as time and interestest permits for the reasons we discussed.

Regarding sampling in Mexico. Gil Rosenthal emailed this morning and said we can use his field station and provide a few more names. I contacted Edna Garcia this morning and so we should hear back from her soon. I have a call with Alberto from WWF (Rio Conchos) tentatively on Friday. So, I'm cautiously optimistic that we can get the field sampling portion of the trip off the ground soon than later.

Let us know if you have any questions.

Charles
